# Medical Assistant

المساعد الطبي

HUSSEIN ABU SHAWISH

## ❖ Project Description:

"**Medical Assistant**" **المساعد الطبي** is an Arabic medical web platform designed to empower doctors in efficiently organizing and managing their daily tasks. The platform primarily focuses on assisting physicians in scheduling and organizing surgical operations, documenting medical cases, and tracking patient progress through a user-friendly interface.

Additionally, the platform allows the publication of reliable medical articles written by certified doctors, aiming to enrich Arabic medical content and foster effective communication between healthcare professionals and the community.

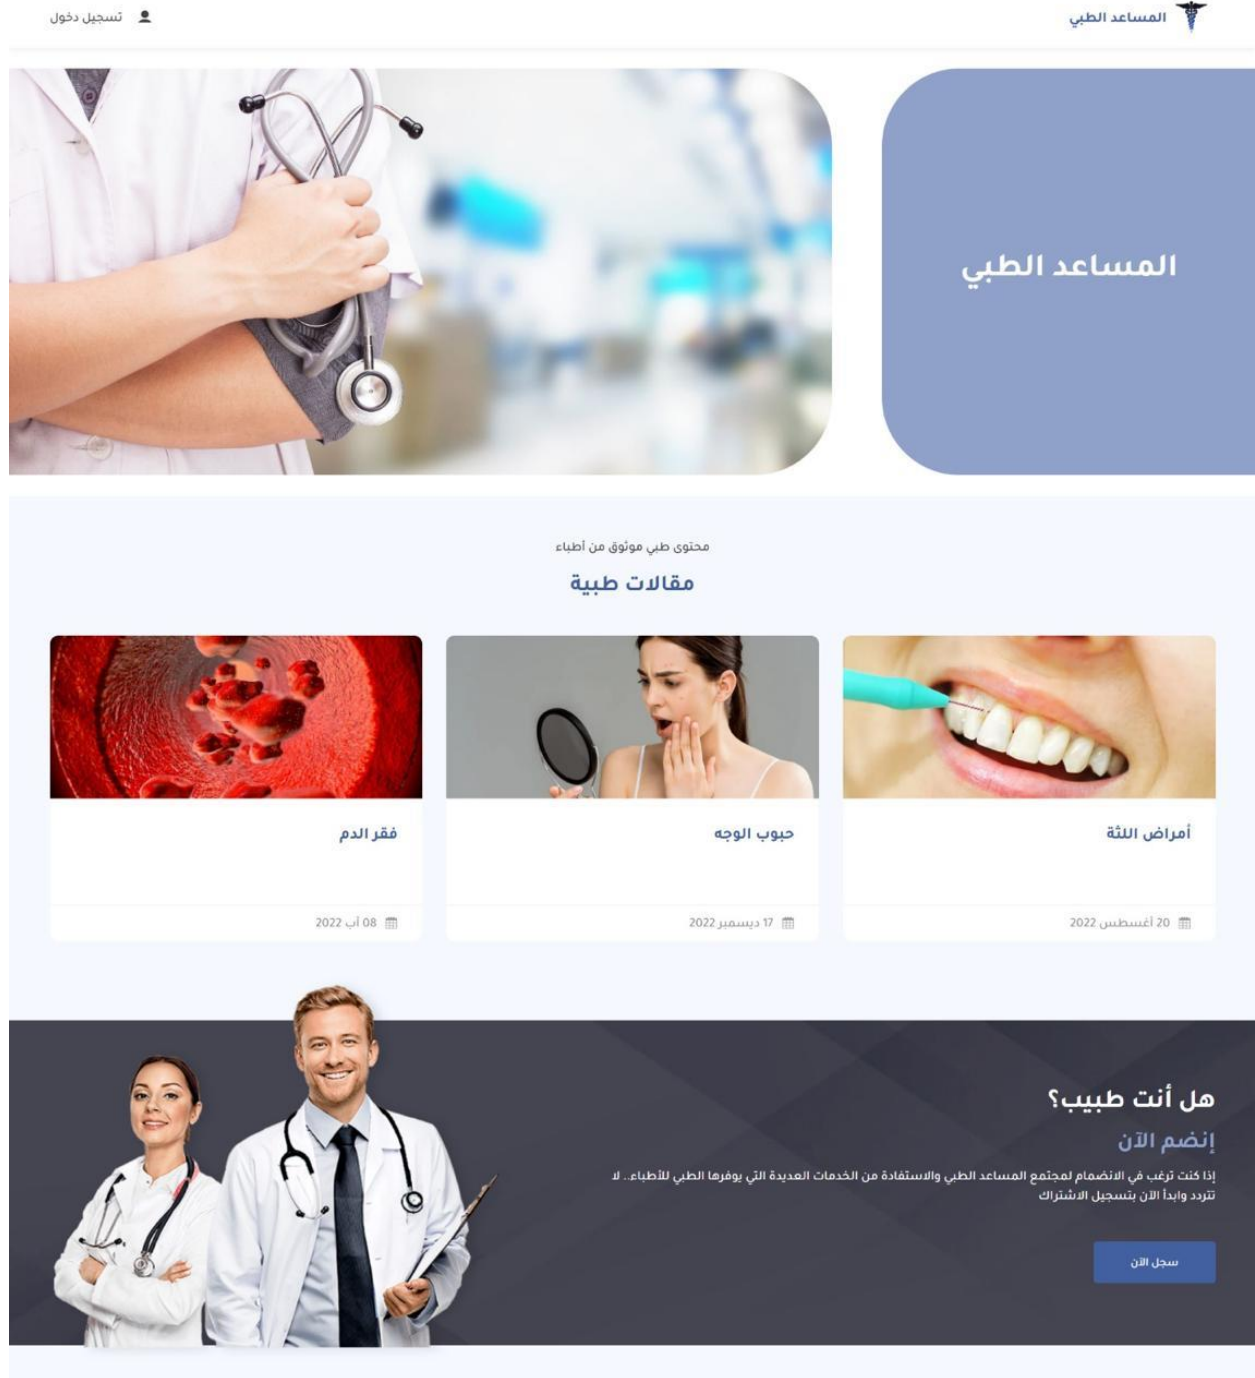

## ❖ The platform provides doctors with the ability to:

- Create a professional personal account.
- Record patient data and track the development of their conditions.
- Schedule surgeries and medical procedures in an organized manner.
- Write medical notes and update patient files.
- Create medical blogs to share knowledge and professional experiences.
- Share reliable medical content with colleagues or the general public.

## ❖ Technologies Used:

- **Front-end:** HTML, CSS, JavaScript
- **Back-end:** PHP Laravel.
- **Database:** MySQL.

## ❖ Landing Page :

**Description:**

The landing page of the "Medical Assistant" website reflects a smooth and simple design that focuses on user comfort and easy navigation.

The interface features calm colors and a well-organized layout that guides visitors to the most important content without complexity.

The page includes a collection of medical articles written and prepared by certified doctors registered in the system, adding credibility and high professionalism to the content.

The articles are displayed in an attractive manner and categorized by medical specialties to make information more accessible.

This page aims to provide a comfortable and secure user experience and serves as the main entry point to explore the rest of the site's services.

## ❖ Login Page

The login page features a clean, professional design. On the left, a light yellow box contains the login form with the title "تسجيل الدخول" (Login). It includes input fields for an email address (pre-filled with "zifuxaz@mailinator.com") and a password (masked with "\*\*\*\*\*"). A blue "تسجيل الدخول" (Login) button is positioned below the fields. A link "هل نسيت كلمة المرور؟" (Forgot your password?) is located below the password field. At the bottom of the form, a link "ليس لديك حساب ؟ انضم الآن" (Don't have an account? Join now) is displayed. On the right, a blue panel with the title "المساعد الطبي" (Medical Assistant) and a caduceus icon provides information about the platform, stating it is a medical Arabic platform for doctors to register and monitor cases, and a place for patients to register and monitor cases.

### Description:

The login page is designed in a simple and secure way that enables users to easily access their accounts.

It includes fields for entering an email address and password, along with a "Login" button.

There is also a link to recover the password in case it is forgotten, enhancing the user experience and providing necessary support.

The page features a clean and professional design that reflects the medical identity of the website, with a strong emphasis on data privacy and user security.

## ❖ Create Account :

### Description:

The "**Create Account for Doctors**" page serves as a dedicated gateway for doctors to join the system in an easy and secure way. This page enables doctors to register a new account by filling out a form that includes essential information such as: Professional email , Password and its confirmation , Medical specialty and Mobile phone number

The page is designed to be clear and user-friendly, with attention to user experience to ensure fast and easy registration. It also includes a notice about the privacy policy and terms of use, which enhances trust and reflects the professionalism of the platform.

## ❖ Operations Schedule Interface

### Description:

This interface is part of the doctor's control panel, where they can manage the schedule of surgical operations.

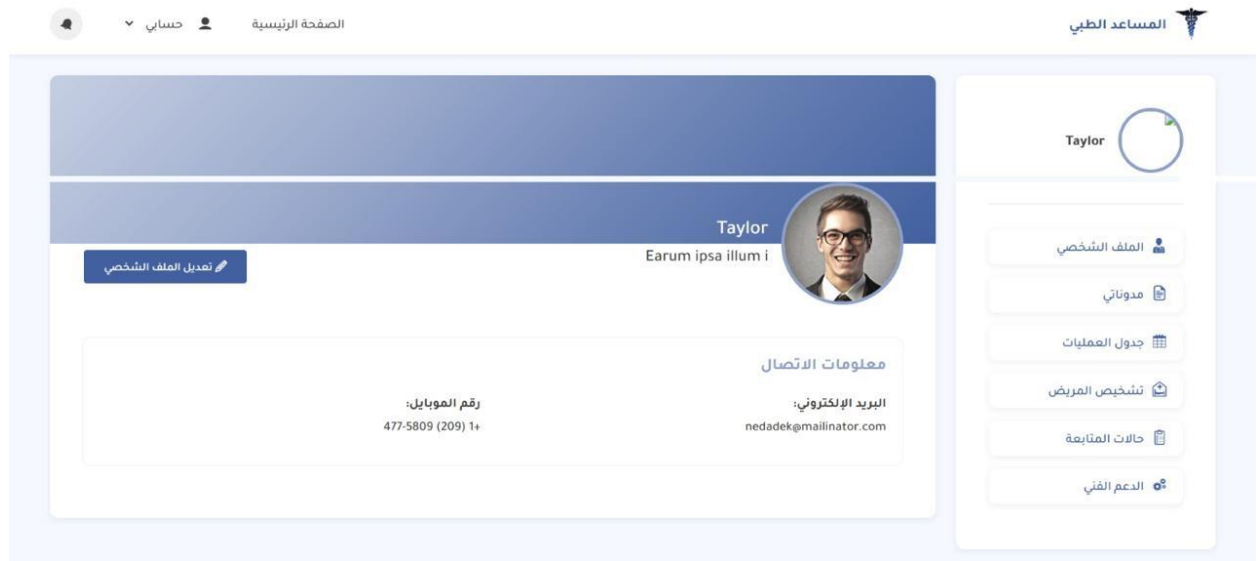

Operations are displayed in a well-organized table that includes: Patient Name, Type of Operation, Hospital Name, Department, and Date.

The interface provides edit and delete buttons for each operation entry.

There is also an "Add" button at the top of the table that allows the doctor to easily add a new operation record.

The design is clear and flexible, offering a fast and organized way to present operational data.

## ❖ Doctor's Profile Interface :

### Description:

This interface displays the personal information of the doctor registered in the system, including their name, profile picture, email address, and mobile number. It also includes an "Edit Profile" feature that allows the user to easily update their information.

On the right-hand side, there is a sidebar containing the main navigation sections such as: Personal Profile, Blogs, Operations Schedule, Patient Diagnosis, Follow-up Cases, and Technical Support.

The interface is simple and well-organized, making it easy for users to navigate and quickly access their personal data.

## ❖ Create Articles

### Description:

The "**Create Article**" page provides a simple and user-friendly interface that allows users to add new articles to the platform. It enables the writer to enter the article title and write the content using a rich text editor that supports visual formatting (such as headings, paragraphs, images, and links).

The page is designed to encourage creativity and simplify the publishing process.

## ❖ Report an Issue / Contact Support

### Description:

The "**Report an Issue to Technical Support**" page allows users to directly communicate with the support team to report any problem or issue they encounter while using the system. Users can fill out a simple form that includes:

- Issue title
- Detailed description of the problem
- Contact information such as email address

The page is designed to be easy to use and responsive, ensuring that reports and issues reach the appropriate team and are addressed as quickly as possible. It also reflects the platform's commitment to improving user experience and providing effective, around-the-clock support.
